DATE MAILED: 01/23/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/821,575

Applicant(s)

CAMPBELL, BRIAN J.

Examiner

Daniel D. Chang

Art Unit

2819

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 November 2005.
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☐ Claim(s) _____ is/are allowed.
6) ☒ Claim(s) 1-18 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☒ The drawing(s) filed on 4/9/04 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, 7, 8, 11, 13, 14, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Sigal et al. (US 5,543,731, “Sigal” hereinafter).

Regarding claim 1, Sigal discloses, at least in Fig. 6, a multiplexer, comprising:

a first logic module (GATE 1) operable to receive a first plurality of data input signals (DATA_A, DATA_B) and a first set of select signals (SELECT_A, SELECT_B) and to generate a first output signal (A) in response thereto;

a second logic module (GATE 2, not shown but similar to GATE 1; col. 3, lines 33+) operable to receive said first set of data input signals and a first set of complementary select signals corresponding to said first set of select signals and to generate a second output signal in response thereto;

an output line (Q) operable to receive a plurality of output signals from said first and second logic modules;

a first gate (inherent transistor in NAND 1) operable to receive said first output signal and to transfer said first output signal to said output line; and

a second gate (another inherent transistor in NAND 1) operable to receive said second output signal and to transfer said second output signal to said output line;

wherein the capacitive loading of said first and second logic modules of each of said data

Art Unit: 2819

input units is isolated from said output line by said first and second gates, respectively (inherent for NAND 1).

Regarding claim 2, Sigal discloses, at least in Fig. 6, that the first and second logic modules comprise static logic (col. 3, lines 12+).

Regarding claim 5, Sigal discloses, at least in Fig. 6 a keeper circuit (LATCH) operable to maintain said output line at a predetermined voltage.

Claims 7, 8, 11, 13, 14, and 17 are essentially the same in scope as claims discussed above and are rejected similarly.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 12, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sigal.

Sigal discloses the claimed invention except for the output line not connected to a keeper. It would have been obvious to one having ordinary skill in the art at the time the invention was made to disconnect the keeper from the output line, since it has been held that constructing a formerly integral structure in various elements involves only routine skill in the art. *Nerwin v. Erlichman*, 168 USPQ 177, 179.

Art Unit: 2819

Claims 3, 4, 9, 10, 15, and 16, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sigal in view of Horenstein ("Microelectronic Circuits & Devices", 1990 by Prentice-Hall, Inc.).

Lin discloses a multiplexer as discussed above and further discloses a NAND gate (NAND1 in Fig. 6) but does not specifically disclose that the first and second gate comprises a pMOS and an nMOS transistor, respectively.

Horenstein shows a NAND gate having a pMOS and an nMOS transistors.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to substitute the NAND gate of Sigal with the NAND gate of Horenstein. It is an obvious matter of substitution of equivalence.

Response to Arguments

Applicant's arguments filed November 9, 2005 have been fully considered but they are not persuasive.

Applicant argues on page 6 of the Amendment filed November 9, 2005, that "the logic module in Figure 6 does not comprise a first set of complementary select signals". However, Sigal teaches in col. 3, lines 33+ that "by using complex gate GATE1 and NAND1 it is possible to make very wide multiplexers (i.e., with many input and select lines)." This means there will be many other similar gates as GATE1 shown in Fig. 6. Even though each of the gates is similar, a set of select signals at SELECT_A and SELECT_B will be different in order to select different gates (GATE1, GATE2, etc). Therefore there will be an inherent set of complementary select signals for other gate (GATEn).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

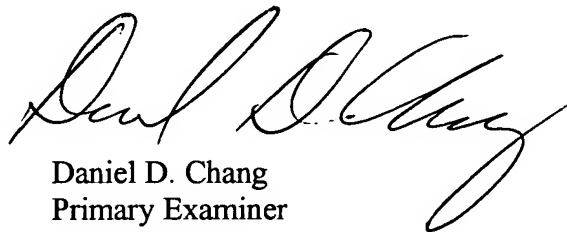

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel D. Chang whose telephone number is (571) 272-1801. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rexford Barnie can be reached on (571) 272-7492. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
